I have been involved with horse/walking/ trails for many years. It is a known fact that once "wheeled" vehicles are allowed, the trails become so badly damaged with ruts that walker/jogger and horse riders no longer use the trails. We are six-month residents here in FLG and six months Cave Creek. I have lived in Cave Creek for 35 years and have watched the Pinnacle Peak, 7 springs, cave Creek Trails, Northern AZ trail area, and now the Elden trails became disamated by the "wheeled" people. They really need their own area to keep to like the area on 89 to the East where they hold ATV gatherings.
